EDUCATION

Bsc Mechanical Engineering University of Lagos, Akoka-Yaba

01/2019 - Present

Lagos State, Nigeria

PERSONAL PROJECTS

Jobber <https://guarded-lake-88106.herokuapp.com/>

- Jobber is a job board made with Bootstrap on the frontend and Laravel on the backend. It has a series of job listings and employer contacts with authentication
- - The image files are served from AWS S3

Personal Blog App <https://nelson-blog-app.netlify.app/>

- I built my personal blog app with Vue and tailwindcss.
- - It has dark/light mode theme
- - It has a rich text editor made with QuillJS.
- - It has google oauth2 login and regular email/password login

Blog-API <https://github.com/Nelwhix/blog-api>

- This is a laravel API for my Vue Blog app.
- It has session based authentication for only my SPA.
- It also has two types of users, Admin and guest. Admin has full admin abilities while guest are only allowed to view resources.

Quotsy-api <https://github.com/Nelwhix/quotsy-api>

- Laravel API that responds with inspirational quotes
- Token based authentication with Laravel Sanctum
- Only authenticated users are allowed to delete, update or add new quotes to the db
- Guest users can search and view quotes

Calyx Restaurants <https://calyx-vue.netlify.app/>

- Restaurant Landing page made with Vue and TailwindCss.
